Vitax Enhance C	G	3.5 mtr	DP				11.5				

* SP - Single Pass

* DP - Double Pass

The spreader settings are guidelines only.

The spreader should be calibrated prior to application to ensure accuracy.

The spreader settings are based on a walking speed of 5.4 km/hour (1.5m per second).

Walking faster or slower than 5.4 km/hour will alter the spread width and application rate.

Exact rates are dependent upon the spreader itself and the accuracy of the person operating it.
